

## Greenhouse Production [NOP §205.204 (a)]

1. Describe your greenhouse facility. What is the type and size? If treated wood is used, tell where it is used and how soil contamination is avoided? [NOP §205.206 (f)]
2. Explain your growing system. Are seedlings just started or are plants raised to maturity? Do plants grow in the ground, in pots, or on benches? During which seasons are you using the greenhouse? How do you use various input products. [NOP §205.201 (a)(1)]
3. Describe your watering system. What equipment is used? What is mixed with the water? Is the water filtered? [NOP §205.201 (a)(1)]
4. What do you use for soil media? Tell the source and ingredients. Include a label. [NOP §205.201 (a)(2)]
5. If both organic and non-organic production takes place in the greenhouse, explain what is done to prevent mixing the seedlings and contamination by products used in conventional production. [NOP §205.272 (a)]
6. How are pests and diseases managed in the greenhouse? [NOP §205.205].
