

Please note: These procedures may be revised as the situation continues to change.

All previously H5N1-Infected Premises must be *both* CLEANED and DISINFECTED.

DEFINITIONS

Cleaning: The removal of gross contamination, organic material, and debris from the premises. Can be via mechanical means like sweeping (dry cleaning) and/or the use of water and a soap or detergent (wet cleaning).

Disinfection: Methods used on surfaces to destroy or eliminate H5N1. Can be physical (e.g., heat) or chemical (e.g., disinfectant). A combination of methods may be required.

OPTIONS

For premises that can be cleaned & disinfected (most premises):

A premises may require a *combination* of methods, but *at least one* choice must be selected from Step 1 and Step 2. The C&D Options selected and implemented *must* be included as part of the APPROVED Flock Plan.

For premises that can't be cleaned & disinfected:

In the unusual case in which premises cannot be cleaned and disinfected, allowing for 120-days (temperature dependent) is prescribed. Allowing should be reserved for premises that would need to be completely repaired or destroyed in order to be effectively cleaned and disinfected.
