

Regional Coordinators provide technical assistance to soil and water conservation districts, staff, watershed organizations and other community groups to more effectively administer existing watershed and water quality efforts, as well as in the conceptualization and development of new watershed-based efforts addressing a wide variety of natural resource issues.

These positions were created by the Iowa Department of Agriculture & Land Stewardship—Division of Soil Conservation in a cooperative effort with the Iowa Department of Natural Resources, through a grant from the U.S. Environmental Protection Agency under the Federal Nonpoint Source Management Program (Section 319 of the Clean Water Act), and the USDA Natural Resources Conservation Service.
